CSE420:Compiler Design

Examination: Quiz 1

Semester: Fall 25

Time: 25 min

Marks: 15

Name:		ID:	Section:
-------	--	-----	----------

Question 1

Differentiate between the analysis and synthesis phases in a compiler. Explain how error detection is limited to the analysis part.

Question 2

What types of errors are typically detected during the compilation process, and which phases of the compiler are responsible for identifying each?
